- Warehousing – bonded and non-bonded

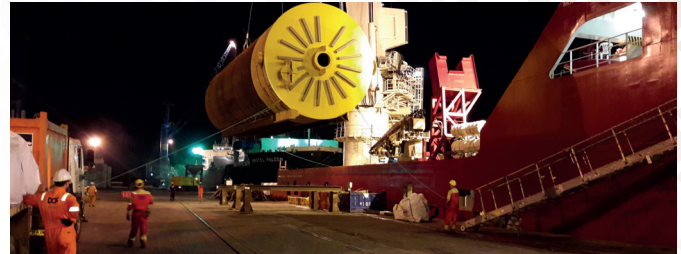

# Oil & Gas in West Africa

OMA provides ship agency, husbandry services and logistics support to the oil & gas industry including:

- On and offshore logistics support to operators and contractors
- Compliance through company policies and ISO led workflows
- Opportunities for OPEX reduction through the provision of common facilities and use of equipment

Our comprehensive list of services dedicated to oil & gas projects developments will include:

- Fully integrated logistics services
- Port operations and logistics support services
  - handling equipment and transport
- Off-port storage and warehousing solutions
- Provision of specialised personnel, manning, meet & greet, crew handling

We have detailed written policies addressing QHSSE, Compliance & Ethics and are committed to conduct our business activities in a responsible, transparent and ethical way. We understand and comply with local content regulations.

We are TRACE certified for which we are audited every year and are currently investing in an integrated management system in Senegal based upon ISO 9001:2015 and EMS 14001:2015. We intend to be certified in early 2019.

# OMA's vision for Senegal

- Promote local companies for the provision of personnel and maintenance services for all handling & lifting equipment
- Bring innovation through the implementation of digital solutions to manage:
  - port and off-port operations
  - the sharing of resources with our clients – both personnel and equipment - leading to increased efficiency and cost savings
- Develop strategic partnerships with internationally recognised contractors for waste management and pipe maintenance services
